

What can you do to help protect yourself, your family and neighbors? Consider becoming a trained **Skywarn™ Spotter**. A trained spotter knows the weather threats in Metro Atlanta, safety rules, and visual clues regarding thunderstorm strength.

"**SKYWARN™**" is a program the National Weather Service uses to improve severe storm warnings. Trained volunteers serve as storm spotters...passing on vital "ground truth" information to forecasters during severe weather episodes. They are the eyes and ears not only for forecasters, but for their whole community.

SKYWARN™ volunteers come from all walks of life but they all have generally two things in common...an interest in the weather, and an interest in serving their community. Organizations frequently involved in the effort include...

- emergency management
- law enforcement
- fire departments
- amateur radio groups.
